Synopsis

The Path to Zero argues that it is time to re-open the public debate on nuclear weapons. In a series of clear and well-reasoned dialogues, long-time scholars and peace activists Richard Falk and David Krieger probe key questions about our nuclear capability and dig beneath the secrecy that has largely surrounded its existence. Falk and Krieger argue that Hiroshima and Nagasaki were only the beginning. In recent times, nuclear annihilation at the hands of rogue states and terrorists has become an even greater concern than the spectre of nuclear war between superpowers. The Path to Zero argues that whilst none of us has the power to bring about global change alone, together we are immensely powerful - powerful enough to overcome the threats of the Nuclear Age and move us appreciably along 'the path to zero'.
